

Claremont Customer Case Study

Claremont Customer Case Study

Industry: Education

Application: School Signage

Claremont
INDEPENDENT DAY SCHOOL

Campus signage

Centralizing the update process of all the TV signs around the day school perimeter using a simple backend.

Claremont, an independent day school in East Sussex area, UK, is using NoviSign's Android based digital signage as a solution for their multiple screens around the school campus.

Claremont School is an independent School in East Sussex, UK. They have several schools across the East Sussex area and they needed a way to provide up-to-date information to students and parents within the school. NoviSign offered a very simple and cost effective solution to this. “We have several basic TVs across the sites all with Android TV sticks plugged in to them. The NoviSign app is installed onto each of them and then sitting at a PC with an internet connection we can edit the screens very quickly from the online ‘what you see is what you get’ editor.

We’ve found it extremely quick and easy to edit our screens by dragging and dropping content and clicking save. Within minutes the new content is on the screens. Select teachers can now edit the content on the screens quickly and easily.” said Mr. Andy Clifton, Claremont School Manager.
